COSL COSL941 Successfully Commenced Drilling in Beibu Gulf

COSL "COSL941" Successfully Commenced Drilling in Beibu Gulf

(18 September, 2006) China Oilfield Services Limited ("COSL" or the "Company", stock code: 2883HK) announced today that its jack-up drilling rig "COSL941" has recently been towed to Beibu Gulf, South China Sea and has successfully started its first well drilling operation there. This marked the official commencement of operations of "COSL941", the first advanced drilling rig constructed in China.

"COSL941" is the Company's first 400 feet jack-up drilling rig, which was delivered on 31 May 2006. Its successful commencement of drilling is an important milestone to the Company's drilling history.

Mr. Yuan Guangyu, CEO and President of COSL, said, "The construction project of COSL941 is the biggest project the Company ever invested in since our public offering. Its delivery greatly enhanced our integrated equipment capacity. COSL941's successful commencement of drilling is only the beginning of success, under such favorable market conditions, we are confident and determined in achieving better results."

Background Information about COSL

China Oilfield Services Limited ("COSL", stock code: 2883) is the leading integrated oilfield services provider in the offshore China market. Its services cover each phase of offshore oil and gas exploration, development and production. Its four business segments are drilling services, well services, marine support and transportation services and geophysical services. COSL has been listed on the Main Board of the Stock Exchange of Hong Kong Limited since November 20, 2002. Since March 26, 2004, COSL's stocks can be traded by means of Level I unlisted American Depositary Receipts at OTC (over-the-counter) market in the United States. The ticker symbol is CHOLY.

As at June 30 2006, COSL operated 15 drilling rigs, including 11 jack-ups and three semi-submersibles while operating one leased jack-up rig. In addition, COSL owns and operates the largest and most diverse fleets in offshore China, including 68 support vessels and five oil tankers, one chemical vessel, seven seismic vessels, and four geotech survey vessels. It also has a vast array of modern facilities and equipment for logging, drilling fluids, directional drilling, cementing, well completion and well work-over services.

The majority of COSL's business activities are conducted offshore China, with the other activities extending to different regions of the world such as North and South America, the Middle East, offshore Africa and offshore Europe. COSL and its worldwide employees are dedicated to providing premier quality services, while adhering to the highest health, safety and environmental standards. COSL has obtained the ISO 9000 and ISM (International Safety Management) certifications. COSL also plans to obtain certifications under the ISO 14000 environmental management standard as well as the OSHA 18000 occupational health and safety standards.

COSL Nanhai II Completes First Well Operation in Indonesia

COSL Nanhai II Completes First Well Operation in Indonesia

(13 September, 2006) China Oilfield Services Limited ("COSL" or the "Company", stock code: 2883HK) announced today that its semi-submersible drilling rig "Nanhai II" has recently completed its first well operation in Indonesia.

After the completion of operations in Myanmar in July this year, "Nanhai II" was towed to the waters of Indonesia, where it was scheduled to provide drilling services to the Malaysian firm Genting Oil & Gas Limited ("GOGL"). After sailing for 24 days, it arrived at the designated location on 6 July 2006 and successfully completed the drilling and oil-testing at the well.

The Company has strictly followed its management concepts of safety, regulation and efficiency, and has maintained regulated operation and management of the rig. To provide improved services, the Company has learned from its successful operating experience in Myanmar, which facilitated the smooth completion of operations in Indonesia.

According to the operation plan, "Nanhai II" will continue to operate for GOGL.

Mr. Yuan Guangyu, CEO and President of COSL, said, "The Company will continue to take stable steps in exploring overseas markets. In the first half of 2006, the Company has achieved remarkable results, with overseas revenue contributing up to 20% of COSL's overall revenue. As the Company's overseas market share continues to increase, the "COSL" brand name is being much more recognized and welcomed by new and existing customers. Leveraging on such opportunities, we will continue to provide qualified services to our clients, bringing greater value to our shareholders."

- End -

Background Information about Genting Oil & Gas Limited:

Genting Oil & Gas Limited ("GOGL") is an independent oil and gas exploration and production company with international operations. It is based in Kuala Lumpur, Malaysia, and has branch offices in Jakarta, Indonesia, and in Beijing and other cities in China. Since its establishment in 1996, GOGL has undertaken a number of international oil and gas exploration, development and production projects in several countries. GOGL is always active in its search for new opportunities that can add value or synergy to its parent company, Genting Berhad.

ELIS-Successful Debut in Bohai

ELIS-Successful Debut in Bohai

As the Enhanced Logging Image System ("ELIS") completed the logging services in LD (Liao Dong) 5-2-A15 on September 2, 2006, it marked the success of COSL's latest self-developed logging system, with complete self-owned intellectual property right, in Bohai. Before the operation commenced, the Company's specialized unit had gone through cautious preparation, focusing on the stability of the system and demonstrating onsite tests to ensure the successful operation.

On August 27, the equipment of ELIS was shipped to LD5-2 in Bohai. The workers arrived on August 30 for testing. They carried out regular tests for the equipment on consecutive nights until 4am.

As planned, logging services was conducted for A15 well by 5700 system on September 1. ELIS was then carried out for logging on September 2 for a total of seven hours, from 5:00 to 12:00. Finally, a safe, quality and highly efficient logging service was completed.

Before that, the Company's ELIS had successfully operated in UAE and won recognition from the market. This is the first operation of the system in Bohai.
